2014–2015 **CTO**, ISM Technology, Istanbul.

In the ISM Technology, we have built a tool named Propars; which can integrate your local e-commerce site to all local or global marketplaces such as ebay.com, amazon.com, n11.com, sahibinden.com, and so.. I have built the whole structure and the architecture of the platform. This platform is working as a cloud based platform which is getting the power from AWS. The platform is working as an API, with tons of async tasks to parse and integrate the incoming xml or json items.

List of Technologies we used:
- Django
- Django Rest Framework
- Postgresql
- Rabbitmq
- lxml
- React (for frontend)

2013–2014 **Head of Software Development**, ArtIstanbulPR, Istanbul.

Development and testing of Callcenter application for iDATA: Our application gives you a proper Consulate appointment date due to your nationality, purpose of visit & some other information. The application is working like a ticket reservation system. It reserves & unreservers available slots. Also the application gives you some reports about schedules, slots & customers.

Key Technologies:
- Django
- Postgresql
- RabbitMQ
- Angularjs (for frontend)
- Nodejs (socketio) for web sockets

2011–2013 **Head of Software Development**, ArtIstanbulPR, Istanbul.

Visa application development for Germany, Italy & Netherlands to iDATA: Our application takes some information from the customer and reproduces the form within the information. Application does the different tasks such as sending emails or sms messages when needed. And also creates sophisticated reports via given information. Also we adapted thermal barcode printers and barcode scanners in our project. All operations are made via barcode system.

Key Technologies:
- CodeIgniter
- Postgresql
- Twitter Bootstrap (for frontend)

2012–2013 **Country Community Manager**, RIM (BlackBerry), Istanbul.

Giving lectures about mobile programming in 6 universities. Also giving consultancy about mobile programming on BlackBerry 10 platform to BlackBerry partner companies.

2010–2011 **Senior Software Developer**, Ozgur Yazilim A.S., Ankara.

I developed so many web sites & web applications for customers & for in house using, mostly written in Python & PHP

2009–2010 **Software Developer**, Fisek Institute, Ankara.

I developed so many web sites & web applications for customers & for in house using, mostly written in Python & PHP
